

## **DOL Awards Citizant \$3.5 Million Contract for Program Management and Acquisition Support**

*Citizant and Washington Consulting to Guide Acquisition of Document Management Solution*

**CHANTILLY, Va., August 11, 2009** — Citizant, one of the Washington region's leading providers of professional technical solutions and business services to the government, has been awarded a contract by the U.S. Department of Labor (DOL) to support the procurement of the Departments' Document Management/Records Management (DM/RM) Solution. The contract has an estimated value of \$3.5 million over three years if all options are exercised.

"Citizant's strength in enterprise-level program management and acquisition support, combined with Washington Consulting's proven track record supporting DM/RM solutions at DOL, uniquely positions the team to guide DOL through this important initiative," said Alba M. Alemán, president and co-founder of Citizant. "This is Citizant's first engagement with DOL and we are honored to be driving the procurement of a comprehensive solution that will allow all DOL agencies to leverage a standard set of DM/RM services that meets their mission, customer, business, and records requirements."

Under the contract, Citizant and partner Washington Consulting, Inc. (WCI), an Alion Company, will provide program management, acquisition, and enterprise content management subject matter expertise to help the DOL Office of the Chief Information Officer (OCIO) acquire and implement an enterprise-wide electronic content management system. This system will streamline document and records management within DOL, support more efficient business processes, provide comprehensive information faster and more reliably, and meet new Federal information archiving and retrieval requirements.

The Citizant-Washington Consulting team will support the entire acquisition life-cycle beginning with gathering and validating the technical, functional, and architecture requirements to support pre-solicitation activity, then guiding the solicitation and award process, and ultimately providing DM/RM program management and IT governance support post-award.

To guide DOL through these activities and ensure sound IT investment, the team will leverage DOL's Capital Planning Investment Control (CPIC), Enterprise Architecture (EA), Security, and System Development Life Cycle Management (SDLCM) methodologies.

The ultimate goal of this initiative is the establishment of a unified document management and records management enterprise solution to deliver critical capabilities for records storage, management, and access for users across the DOL enterprise.

### **About Citizant**

Citizant partners with government organizations to develop forward-thinking business and technology solutions that create a better future for all citizens.
